PROFESSIONAL SUMMARY

I am a Full Stack Developer who recently graduated in Computer Science with internships in React and Android development. At Sortup I built the frontend connected it to Supabase backend services created and integrated backend APIs. I start from the problem and build the whole solution for my final year project I built AI Powered FYP Portal for my University to bring scattered documents and manual approvals into a single workflow with role based access, AI project suggestions and semantic similarity checks. Self motivated and disciplined with a consistent work ethics, a strong sense of ownership and a commitment to turning ideas into practical solutions.

EDUCATION

BS Computer Science Sep 2022 – Jul 2026

COMSATS University Islamabad, Vehari Campus

CGPA 3.22 / 4.00

EXPERIENCE

React Developer (Intern) · Sortup Pvt. Ltd., Lahore (On-site) Aug 2026 – Oct 2026

- Contribute to React frontend development and practice how to integrate backend services
- Gain hands on experience with React Native through mobile app projects
- Collaborate with the development team on real projects and practice how to use Git and GitHub for code management in real projects

Android App Development (Intern) · We Connect, Vehari (On-site) Jul 2024 – Sep 2024

- Collaborated on mobile application tasks
- Feature improvements, testing, and debugging
- Helped refine performance and reliability while learning professional team workflows

PROJECTS

AI-Powered FYP Suggestion & Submission Portal · `React` · `Firebase` · `FastAPI` Live

- Built role based Student, Supervisor and Admin workflows with AI suggestions, semantic similarity checks, PDF processing with OCR and milestone tracking.
- Added route guards with university domain authentication, group formation, supervisor approved project locking and five phase milestone tracking secured with Firestore rules.

RoadWatch Traffic Monitoring Platform · `React` · `React Native` · `Supabase` · `PostgreSQL` App · Dashboard

- Wrote the PRD, validated video based violation detection with a proof of concept, designed the ERD and schema, created app and dashboard UI in Magic Patterns, then implemented it and integrated Supabase services.
- Two parts a mobile app for reporters and a web dashboard for human reviewers.

Multi-Role Healthcare Appointment Management · `React` · `Supabase` · `PostgreSQL` Live

- Developed authenticated, role based booking workflows with PostgreSQL scheduling, Row Level Security, server validated bookings and Playwright end-to-end tests.
- Four step patient booking with overlap prevention in the database, private document storage, GitHub Actions running build and Playwright tests across desktop, tablet and mobile.

Hirely Multi-Role Job Portal · `React` · `Supabase` · `PostgreSQL` Live

- Built Candidate, Recruiter and Admin workspaces covering job discovery, applicant pipeline, messaging and analytics.
- Includes ATS pipeline, interview scheduling, resume center, job alerts, and admin moderation with audit logs deployed on Vercel.

TECHNICAL SKILLS

Languages	C++ · Python · HTML · CSS · JavaScript · TypeScript · Node JS
Frameworks	React · React Native · Flutter
Backend	Supabase · Firebase · Firestore · MySQL · PostgreSQL · REST APIs · FastAPI
Tools	Git · GitHub · VS Code · Android Studio · Google Colab

CERTIFICATIONS

- React JS Complete — Cursa
- Node JS Complete — Cursa
- Machine Learning and AI coursework — Udemy
- React: All You Need to Know — Udemy
- Dart and Flutter: Mobile App Development — Udemy
- Mobile App Development with Flutter — Alison
